**Education and Sustainable Development (EDU 355)**

Credit Hours: 3

Instructor: Tayyaba Tamim

Schedule: Monday to Friday (10.15 AM – 12.15 PM)

The new 2030 Agenda for Sustainable Development clearly reflects the urgency to embed the principles of education for sustainable development (ESD) into all levels of education. Central in this new course is exploring the role and responsibility of education in not only responding to sustainability problems but also in preventing them and in creating more sustainable futures.

Following UNESCO, the course aims to engage the learners in different types of learning - learning to know, learning to be, learning to live together, learning to do and learning to transform oneself and society.” From this vantage point, ESD is about engaging learners in sustainable development issues, developing their capacities to contribute towards an education that is cognizant of and is geared towards taking the vital step today for a sustainable and peaceful future for all by generating innovative solutions to SD challenges and crises.
